188 pages, 245 illustrations, size 8.25 x 11 inches. A faithful reproduction of the 1967 Floyd Clymer publication of the official 1960 Honda Factory Workshop Manual for the 250-305 series C72, C77, CS72, CS77, CB72, CB77 (Hawk). This series of motorcycles were introduced in 1960 and the last year for manufacture was 1967 however, some models were sold and titled in the US during 1968 and 1969. There are exhaustive tables of technical data, tolerances and fits and all of the expected data from a factory publication for the repair and overhaul of all major and minor mechanical and electrical components, making it an invaluable resource for collectors and restorers of these classic Honda motorcycles. There are 245 illustrations and each procedure is explained in a step-by-step method using an appropriate illustration. The translation from Japanese to English is, at times, a little quirky but the profuse illustrations make up for any difficulty in understanding what needs to be done! There are separate sections that deal with the repair and overhaul procedures for the engine, transmission, wheels and brakes, front forks, frame and carburetor, plus a detailed electrical service section. This is a - must have - reference for any Honda enthusiast and would certainly assist in helping any potential purchaser better understand the inner workings prior purchasing of one of these classic motorcycles. Out-of-print and unavailable for many years, this book is highly sought after on the secondary market and we are pleased to be able to offer this reproduction as a service to all Honda enthusiasts worldwide.

Honda CR250-500R Pro-Link 81-87

170 pages and more than 450 illustrations and charts, size 8.25 x 10.75 inches. This workshop manual is a compilation of 4 original Honda publications. It includes a reproduction of the original 250cc and 360cc twin cylinder 1974 factory workshop manual for both the disc brake and drum brake models, plus 3 factory supplements that cover both the 5 and 6 speed variants, which extends the coverage of the original manual through 1977. The models covered are: CB250, CJ250T, CB360, CL360, CB360T and CJ360T. Many of the earlier Honda motorcycle models were often introduced at different times and in different countries using different model names or designations. For example, the CB 250 was predominantly sold in the European

market and not officially available in the USA. However, the 360cc models were available in both Europe and the USA. Unfortunately, this often leads to difficulty in selecting the correct workshop manual and owners of this series of 250cc and 360cc twins are subjected to considerable confusion surrounding the appropriate selection from the multitude of OEM publications that have recently flooded the on-line marketplace. This confusion is compounded by the fact that Honda used both 5 and 6 speed transmissions within the 1974 to 1977 production run of the 250/360 series. Owners of the 1968-1973 twin cylinder 5-speed 250cc and 350cc models are directed to our Honda factory workshop manual, ISBN 9781588502612. Owners of the 1961-1968 twin cylinder 250cc and 305cc C72 & C77 series will require our Honda factory workshop manual, ISBN 9781588500731. Finally, please note that the text in the original Honda Factory Workshop Manual was translated from Japanese into English. Consequently, some of the phrasing, grammar, punctuation and word usage may be subtly different from that commonly used in the English language. However the information, as presented, is readily understandable. In addition, while we have done our best to identify any anomalies, errors and incorrect spelling that may have occurred during the original translation process, we are certain that we will have missed one or two and we request your indulgence in ignoring them.
